Questions 164-167 refer to the following instructions.

## Zovtech

Zovtech customers are most satisfied when they fully understand how to use their products and get the most out of them. Because Zovtech's products offer many innovative technology features, such as auto-timers on washing machines and variable light settings on microwave ovens, it is important to list and explain these features clearly in the user manuals. Questions 168-171 refer to the following review.

**S-Tor Application**

★★★☆☆

*"I was disappointed with the customer service I received."*

My job involves coordinating large-scale corporate events like trade shows and conventions. — [1] —. Because I am on the road a lot, I have found S-Tor to be perfect for storing vendor lists, program schedules, and other important documents that I need to access digitally wherever I happen to be. — [2] —. In fact, I became so reliant on S-Tor that I never stopped to consider what I would do if I couldn't access it one day.

That day finally came, though, and I was disappointed with the customer service I received. When I contacted the help desk to report that I was unable to log in, I was transferred from representative to representative, each one walking me through the same troubleshooting procedure. — [3] —. I was eventually able to get back into the application, but only after much trial and error. Nonetheless, everyone I spoke with was nice and polite.

In short, I love the S-Tor application, but I have to be certain that I can quickly get it running again if something goes wrong. — [4] —. After this experience with S-Tor's help desk, I have decided to look at similar products to see how they compare.

## **Mayor Kowalik Announces Bus Driver Appreciation Day**

FRECOSTA (April 2)—Mayor Ed Kowalik has declared April 21 the city's first ever Bus Driver Appreciation Day. Bus riders are asked to greet drivers with a warm hello and one of the city's specially designed thank-you cards, which can be printed out from [www.frecosta.gov/transitappreciation](http://www.frecosta.gov/transitappreciation). As an added gesture of gratitude, Mayor Kowalik will invite bus drivers to attend a sporting event free of charge next month.

Because the city's population has increased over the past two years, Frecosta's bus drivers have had to cope with frequent changes to bus routes. However, next year's long-anticipated opening of the Frecosta subway line is expected to alleviate some of the stress on drivers while creating more jobs. The subway line will connect the Bargain Town Shopping Center on the western end of the city with Frecosta Stadium, which is located on the eastern end.

Re: Upcoming changes

Our company recently purchased the JLX software suite to replace our current RERQ suite. With the new software will come a new process. Previously, workers in the shipping area would check the paperwork for the customer's name and search the company address in the database in order to create an address label. With the new process, the supply team completes each order, affixes a bar code sticker to the box, and delivers the box to the shipping area. In the shipping area, we will use a bar code scanner in sync with the new software so that scanning a bar code will automatically print an address label. Addresses for companies that are not in the database will still need to be looked up in the old RERQ software. We will continue to observe the delivery speed indicated on the paperwork. For example, some orders need to arrive by 8 A.M. the next morning. Please continue to highlight the address of such priority deliveries in yellow, then place those boxes on the shelves marked "priority".

We are planning to start using the updated shipping process company-wide from 15 December. One team has been selected to test and provide feedback on the new software, equipment, and procedures during the first week of December. If we find any problems at this trial stage, we may need to postpone the all-around implementation of the new procedure.

Subject:	RE: Fine-tuning work with JLX

Hello Ms. Peralta,

In reply to your request for feedback, I can say that most aspects of the JLX system are working well. However, we do need a better way to handle orders going to companies requiring priority shipping for all their orders, such as Turing Photography. Several of their orders this week did not arrive at their premises by 8 A.M. I think some of our team members have been forgetting to check the labels for the required delivery speed. Also, I was informed our handheld scanners run out of battery power very quickly. Could you look into it?

Thank you,

Aram Mansouri

Dear Sunil,

I hope this message finds you well. You may have heard the news that my family and I are preparing to move from New York to Marrakesh in the fall. In the process, I am hoping to move my marketing firm, Ohayon Marketing, to the area as well.

You may remember that after I left Sharp Smart—and moved out of New Delhi—I freelanced for Craftsplace, which went on to become my company's first client. In more recent years, my company has branched out to consult for a large number of businesses in unrelated industries.

I would like to continue with this work by establishing a client base in Marrakesh. I am reaching out to you because of your contacts in the business community there. If you know anyone who might be interested in the services I offer, would you be so kind as to let me know?

Best wishes,

Marc

### Great product

by Ming Xiong/29 December 7:43 PM

I can't recall the name, but I bought this product based on a recommendation from my car dealer's service department, and it works very well. The liquid comes in a blue bottle with yellow lettering. As a father of three, I have a hard time keeping the interior of my car clean. Many products claim to protect against stains, but this one actually works. All our spills wipe right off. Even more impressive is the price. It costs about the same as other brands but works much better.
